ADDENBROOKES

A state of the art car park.

Saba was the lead consultant on the design, construction and preparatory works for the 1223 space multi-storey car park

Construction took place in a live hospital environment, necessitating **careful planning** to maintain site access and **mitigate the impact** on patients, staff and the public. The design was **tailored to the client's needs** and the local environment incorporating sustainability initiatives. It has been recognised by the Department of Health as a **Good Practice Case Study**.

Saba provides a **24/7 manned service** delivering an **excellent customer experience** and **ensuring the safety and security** of all car park users. It was the first UK hospital to be awarded the Park Mark Plus award.
